## Escape Classroom – Digital Turn

### **Dissemination activity**

ERASMUS + program international school multilateral partnership project “Escape Classroom - Digital Turn Project (E.C.D.T.)” online dissemination event took place on 27th May, 2021 in Italy. Teachers from the whole area were invited to participate. The project coordinator introduced the aim of the project, introduced a “flipped classroom” teaching model too that it is essential to stimulate students to become organizers of their learning process. In this way, teachers can make learning process more efficacious, give students the opportunity to develop important self-study learning skills. Later the project coordinator and the headmaster of the school, presented the project activities that were carried out during the project implementation period 2018-2021. Teachers – Cannizzaro Francesca, Mario Sciacca, Anna Maria Gandolfo and Morreale Rosalba presented their works: lesson plans and self-created videos that are used in lessons. Teachers suggested their good practices, cases of success and challenges while using a “flipped classroom” teaching model in some classes. At the end of the meeting, the project coordinator presented interactive posters that each school created in collaboration with all the partners from Greece, Poland, Italy, Portugal and Spain. The dissemination event was useful and meaningful. First of all to explain the importance of European projects, but especially the impact on the participants, teachers and students that gained lots of knowledge and linguistic competences.
